

Notice of Allowability

Application No.

09/941,046

Examiner

Susanna M. Diaz

Applicant(s)

EITEL ET AL.

Art Unit

3694

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address--

All claims being allowable, PROSECUTION ON THE MERITS IS (OR REMAINS) CLOSED in this application. If not included herewith (or previously mailed), a Notice of Allowance (PTOL-85) or other appropriate communication will be mailed in due course. **THIS NOTICE OF ALLOWABILITY IS NOT A GRANT OF PATENT RIGHTS.** This application is subject to withdrawal from issue at the initiative of the Office or upon petition by the applicant. See 37 CFR 1.313 and MPEP 1308.

1. ☒ This communication is responsive to the Examiner's Amendment agreed to on May 25, 2007.
2. ☒ The allowed claim(s) is/are 1-4,6,8-17,19-31 and 33-41.
3. ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some* c) ☐ None of the:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this national stage application from the International Bureau (PCT Rule 17.2(a)).

* Certified copies not received: _____.

Applicant has THREE MONTHS FROM THE "MAILING DATE" of this communication to file a reply complying with the requirements noted below. Failure to timely comply will result in ABANDONMENT of this application.
THIS THREE-MONTH PERIOD IS NOT EXTENDABLE.

4. ☐ A SUBSTITUTE OATH OR DECLARATION must be submitted. Note the attached EXAMINER'S AMENDMENT or NOTICE OF INFORMAL PATENT APPLICATION (PTO-152) which gives reason(s) why the oath or declaration is deficient.
5. ☐ CORRECTED DRAWINGS (as "replacement sheets") must be submitted.
- (a) ☐ including changes required by the Notice of Draftsperson's Patent Drawing Review (PTO-948) attached
- 1) ☐ hereto or 2) ☐ to Paper No./Mail Date _____.
- (b) ☐ including changes required by the attached Examiner's Amendment / Comment or in the Office action of Paper No./Mail Date _____.
- Identifying indicia such as the application number (see 37 CFR 1.84(c)) should be written on the drawings in the front (not the back) of each sheet. Replacement sheet(s) should be labeled as such in the header according to 37 CFR 1.121(d).
6. ☐ DEPOSIT OF and/or INFORMATION about the deposit of BIOLOGICAL MATERIAL must be submitted. Note the attached Examiner's comment regarding REQUIREMENT FOR THE DEPOSIT OF BIOLOGICAL MATERIAL.

Attachment(s)

1. ☒ Notice of References Cited (PTO-892)
2. ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
3. ☐ Information Disclosure Statements (PTO/SB/08),
Paper No./Mail Date _____
4. ☐ Examiner's Comment Regarding Requirement for Deposit
of Biological Material
5. ☐ Notice of Informal Patent Application
6. ☐ Interview Summary (PTO-413),
Paper No./Mail Date _____
7. ☒ Examiner's Amendment/Comment
8. ☒ Examiner's Statement of Reasons for Allowance
9. ☐ Other _____

PRIMARY EXAMINER

AU 3694

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with James A. Scheer (Reg. No. 29,434) on May 25, 2007.

Please cancel claims 5, 7, 18, and 32.

Please amend claims 1, 6, 14, 19, 27, 28, 33, and 41 as follows:

Claim 1. (Currently Amended) A method of maintaining and improving a performance level of an agent performing a plurality of tasks, such method comprising the steps of:

providing a performance threshold for each task of the plurality of tasks;

electronically monitoring at least ~~one~~ some of the plurality of agent tasks to measure a performance parameters of the agent in completing ~~the at least one successive tasks~~ of the plurality of tasks including the tasks of reciting information from at least some screens of a predetermined progression of screens:

automatically adjusting a respective performance threshold in response to a change in a parameter related to ~~the at least one~~ of the successive tasks task; and

generating a notification of the need for training the agent when the measured performance parameters of the agent in performing a task the successive tasks

Art Unit: 3694

exceeds the respective performance thresholds of the successive tasks ~~for the at least one task~~ of the plurality of tasks.

Claim 6. (Currently Amended) The method of maintaining and improving a performance level of an agent as in claim 5 1 wherein the measured parameter further comprises detected errors in the recited information of the at least some screens.

Claim 14. (Currently Amended) An apparatus for maintaining and improving a performance level of an agent performing a plurality of tasks, such apparatus comprising:

a performance threshold for each task of the plurality of tasks;

means for monitoring at least ~~one~~ some of the plurality of agent tasks to measure a performance parameters of the agent in completing ~~the at least one successive tasks~~ of the plurality of tasks including the tasks of reciting information from at least some screens of a predetermined progression of screens;

means for automatically adjusting a respective performance threshold in response to a change in a parameter related to ~~the at least one~~ of the successive tasks;

and

means for notifying a supervisor when the measured performance parameters of the agent in performing ~~a task~~ the successive tasks exceeds the respective performance thresholds of the successive tasks ~~for the at least one task~~ of the plurality of tasks.

Claim 19. (Currently Amended) The apparatus for maintaining and improving a performance level of an agent as in claim ~~48~~ 14 wherein the means for measuring a performance parameter further comprises means for detecting errors in the recited information of the at least some screens.

Art Unit: 3694

Claim 27. (Currently Amended) An apparatus for maintaining and improving a performance level of a plurality of agents performing a plurality of tasks, such apparatus comprising:

a performance threshold for each task of the plurality of tasks;

means for monitoring at least ~~one~~ some of the plurality of agent tasks to measure a performance parameters of each agent of the plurality of agents in completing ~~the at least one~~ successive tasks of the plurality of tasks including the task of reciting information from at least some screens of a predetermined progression of screens;

means for automatically adjusting the respective performance threshold in response to a change in parameter related to ~~the at least one~~ of the successive task tasks;

means for notifying a supervisor when the measured performance parameters of any agent of the plurality of agents in performing ~~a task~~ the successive tasks exceeds the respective performance thresholds of the ~~task~~ successive tasks ~~for the at least one task~~ of the plurality of tasks; and

means for sorting the notifications to the supervisor based upon a relative magnitude by which the measured performance parameters exceeded the performance thresholds.

Claim 28. (Currently Amended) An apparatus for maintaining and improving a performance level of an agent performing a plurality of tasks, such apparatus comprising:

a performance threshold for each task of the plurality of tasks;

a performance processor adapted to monitor at least ~~one~~ some of the plurality of agent tasks to measure a performance parameters of the agent in completing ~~the at least one~~ successive tasks of the plurality of tasks including the tasks of reciting information from at least some screens of a predetermined progression of screens and adapted to automatically adjust a respective performance threshold ~~of the at least one task~~ in response to a change in a parameter related to ~~the at least one task~~;

Art Unit: 3694

a display adapted to notify a supervisor when the measured performance parameters of the agent in performing ~~a task~~ the successive tasks exceeds the respective performance thresholds of the successive tasks ~~for the at least one task~~ of the plurality of tasks.

Claim 33. (Currently Amended) The apparatus for maintaining and improving a performance level of an agent as in claim 32 28 wherein the means performance processor for measuring a performance parameter further comprises word recognition software adapted to detect errors in the recited information of the at least some screens.

Claim 41. (Currently Amended) An apparatus for maintaining and improving a performance level of a plurality of agents performing a plurality of tasks, such apparatus comprising:

- a performance threshold for each task of the plurality of tasks;

- a performance processor adapted to monitor at least ~~one~~ some of the plurality of agent tasks to measure a performance parameters of each agent of the plurality of agents in completing ~~the at least one~~ successive tasks of the plurality of tasks including the tasks of reciting information from at least some screens of a predetermined progression of screens and adapted to automatically adjust the respective performance threshold ~~of the at least one task~~ in response to a change in parameter related to ~~the at least one task~~;

- a display adapted to notify a supervisor when the measured performance parameters of any agent of the plurality of agents in performing ~~a task~~ the successive tasks exceeds the respective performance thresholds of the successive tasks ~~for the at least one task~~ of the plurality of tasks; and

- a sorting processor adapted to sort the notifications to the supervisor based upon a relative magnitude by which the measured performance parameters exceeded the performance thresholds.

Reasons for Allowance

2. Claims 1-4, 6, 8-17, 19-31, and 33-41 are allowed.

3. The following is an examiner's statement of reasons for allowance:

Stuart (US 2001/0032120) discloses a call agent productivity assessment method and system that notify a supervisor when a call agent's performance has not met required thresholds. However, Stuart does not disclose that the monitored tasks include tasks of reciting information from at least some screens of a predetermined progression of screens nor that a notification is generated when the measured performance parameters of the agent in performing successive tasks exceeds the respective performance thresholds of the successive tasks of the plurality of tasks. While each feature is individually old and well-known, the Examiner submits that the combination of all of these features into one coherent method and apparatus would not have been obvious in light of the prior art of record. Since this combination of features is recited in claims 1-4, 6, 8-17, 19-31, and 33-41, claims 1-4, 6, 8-17, 19-31, and 33-41 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The following references disclose call center monitoring systems/methods:

Heller et al. (U.S. Patent No. 7,110,525)

Elazar (U.S. Patent No. 6,542,602)

Eilbacher et al. (U.S. Patent No. 6,959,078)

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Susanna M. Diaz whose telephone number is (571) 272-6733. The examiner can normally be reached on Monday-Friday, 8 am - 4:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James Trammell can be reached on (571) 272-6712. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
